FIG. 6 is a cross-sectional view of a cable assembly 29. It shows a central core 45 with two layers of conductive material 51. The core is surrounded by an insulation layer 48. The assembly is shown in a bent configuration, with a bend radius 10. The outer layer 51 is shown with a thickness 11. The inner layer 45 is shown with a thickness 10. The assembly is shown with a cross-section 8 and a longitudinal section 9. The assembly is shown with a cross-section 28 and a longitudinal section 29.

FIG. 7 is a cross-sectional view of a cable assembly 29. It shows a central core 45 with two layers of conductive material 50. The core is surrounded by an insulation layer 49. The assembly is shown in a bent configuration, with a bend radius 10. The outer layer 50 is shown with a thickness 11. The inner layer 45 is shown with a thickness 10. The assembly is shown with a cross-section 8 and a longitudinal section 9. The assembly is shown with a cross-section 28 and a longitudinal section 29.
